

IBM WATSON IOT PLATFORM

The screenshot displays the IBM Watson IoT Platform interface in a web browser. The browser's address bar shows the URL: `5pxn9f.internetofthings.ibmcloud.com/dashboard/devices/drilldown/NodeMCU:rasswanth1234?returnTo=/devices/browse`. The page title is "Device Drilldown - rasswanth1234".

On the left, a sidebar menu lists various options: "Device Credentials" (selected), "Connection Information", "Recent Events", "State", "Device Information", "Metadata", "Diagnostics", "Connection Logs", and "Device Actions".

The main content area, titled "Device Credentials", contains the following information:

- Organization ID: 5pxn9f
- Device Type: NodeMCU
- Device ID: rasswanth1234
- Authentication Method: use-token-auth
- Authentication Token: qq_BNpWDJW+xeQ7mW_

A warning message states: "Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token." Below this, a link says "Find out how to add these credentials to your device".

The bottom of the image shows a Windows taskbar with the date and time set to 15:34 on 18-11-2022.
